

## *Comments From Our Technical Director*

In our last newsletter, we shared with you that we would be converting from the Legacy system that was around for over 25 years to the modern Defense Civilian Personnel Data System (m-DCPDS). Conversion of the data went very smoothly for DPCT. 82,722 appropriated fund employee records converted with only 180 errors. When the new personnel system was restarted, we had approximately 3,400 pipeline RPAs to begin inputting and processing. We were able to complete this effort in about 8 days--less time than what we expected. Although we experienced some performance issues early on causing a temporary cap on the number of Air Force-wide users, the system is now at full operating capability. We have also experienced performance issues with CPDSS--our new staffing tool--delaying referrals to you. After several recent patches, significant improvements have been reported. In turn you should begin to see an improvement in the timeliness of our referrals. Our Summer Hire Program is in full swing, and we will be processing the majority of summer actions for the 2 June pay period. As a reminder, timely submission of pre-employment packages will expedite the processing of these time-sensitive actions. We continue to welcome any suggestions you may have for future articles.

**You may provide us suggestions and feedback by E-mail, [Maureen.Weber@randolph.af.mil](mailto:Maureen.Weber@randolph.af.mil) or fax,**

**DSN 665-2932, Attn: DPCTI/Maureen Weber. We look forward to hearing from you.**
